TESSERA

Each piece. The whole.

RAVENNA, ITALY · 430 – 547 AD

THE GOLD THAT CHANGES ALL DAY.

At Ravenna in the 5th and 6th centuries, Byzantine craftsmen built the greatest mosaics in the world. In the Mausoleum of Galla Placidia, 430 AD. In the Basilica of San Vitale, 547 AD. They used individual tesserae — small pieces of glass, stone, and gold leaf — to create images of impossible luminosity.

The gold tesserae were set at a slight angle, deliberately. Each tile faces a different direction, so that throughout the day — from dawn to noon to dusk — the same surface catches light differently. The mosaic at dawn is not the same mosaic at noon. It is the same twelve hundred tiles, reading differently in different light.

547

THE TRANSLATION

"A great estate is not a single object. It is twelve individual residences that together compose something complete."

> Bvlgari's Serpenti jewellery uses the same logic at scale: individual scales forming a continuous sinuous line, each scale catching light at its own angle. The whole is only legible because each piece is distinct. Tessera is the same argument applied to residential architecture: twelve villas, each differently oriented, each catching its own light — and together, a complete world.

01

GOLD TESSERA PANEL

The entrance hall in each villa features a mosaic wall panel — hand-set gold and amber tesserae, each tile individually angled. No two installations are identical. Like the Ravenna originals, the panel reads differently at different times of day. This is the first thing a guest sees.

02

LAPIS THRESHOLD

The entry threshold and primary floor panels in deep lapis-blue stone — the same mineral the Byzantine craftsmen ground to make ultramarine paint. At Tessera it is set in geometric patterns: a floor that declares its lineage without requiring explanation. Cold to the foot. Warm to the eye.

03

BYZANTINE GEOMETRY

Every window opening, archway, and room transition is governed by Byzantine geometric proportions — the ratio systems developed in the 5th century to produce spaces that feel larger than their measurements. Not ornament. Structural logic that manifests as spatial generosity.

04

THE MOSAIC GARDEN FLOOR

The private garden of each villa is floored in small-format natural stone set in geometric patterns — a contemporary reinterpretation of the Roman garden floor tradition. The pattern is unique to each villa. No two gardens share a design. Each tessera of the estate is, in this way, irreducibly its own.

"The estate is twelve pieces. The pieces are the estate."

Every material decision at Tessera follows the mosaic principle: individual elements, individually considered, that together produce something greater than any single component. The whole is only visible from a distance. Up close, each tile is complete in itself.

TWELVE PIECES.
ONE ESTATE.
EACH ITS OWN.

PRIVATE VILLAS

XII

TOTAL, ACROSS THE ESTATE.

CONFIGURATION Single-storey · Private gate · Each on own plot	ORIENTATION Each villa faces a distinct sightline · No two alike	MOSAIC FEATURE Hand-set gold tessera panel · Unique to each villa
GARDEN FLOOR Geometric stone mosaic · Individual pattern per villa	PRICE RANGE Rs 13 – 20 Crore · By private appointment	THRESHOLD Lapis blue stone entry · Byzantine proportions throughout

THE RAVENNA PRINCIPLE

EACH TILE. ITS OWN LIGHT.

The craftsmen at Ravenna did not set the gold tesserae flat. They set each one at a slight angle — different from its neighbour — so that throughout the day, as the sun moved, the surface changed. The same mosaic at dawn was not the same mosaic at dusk. Each piece was complete. Together, they were extraordinary.

"

At Ravenna, the gold tesserae were set at angles — each tile catching light from a different direction. The same mosaic reads differently at dawn, noon, and dusk. This is the principle of Tessera: the estate is twelve individual residences, each oriented differently, each catching its own light. Together they compose a complete world, the way a mosaic is only visible from a distance. Up close, each tile stands entirely alone.

PRASHASHAN NAGAR · JUBILEE HILLS · HYDERABAD

Year old canopy.
Mature trees throughout.

XII
Villas behind
one gate. No more.

Prashashan Nagar in Jubilee Hills is the address that a mosaic is made of: twelve individual villas, each differently positioned on the estate, each oriented to its own sightline. Viewed from above, they compose a complete neighbourhood. Lived in from within, each one is entirely its own. This is not a cluster of identical units. It is twelve distinct pieces of ground in a place that stopped needing to explain itself decades ago — and together, they make something whole.

THE DEVELOPER

SSQUARE
EST. 1991

Thirty-five years building the commercial infrastructure of a city that never stopped growing. Over ten million square feet of premium commercial real estate in Hyderabad — privately held, privately financed, delivered without announcement. SSquare has never needed to advertise its standard. Its buildings have always been the argument.

Tessera is their first and only residential project. The same precision that assembled their commercial portfolio, applied for the first time to twelve residences — each piece individual, each contributing to something that is only complete when all twelve are placed.

35
