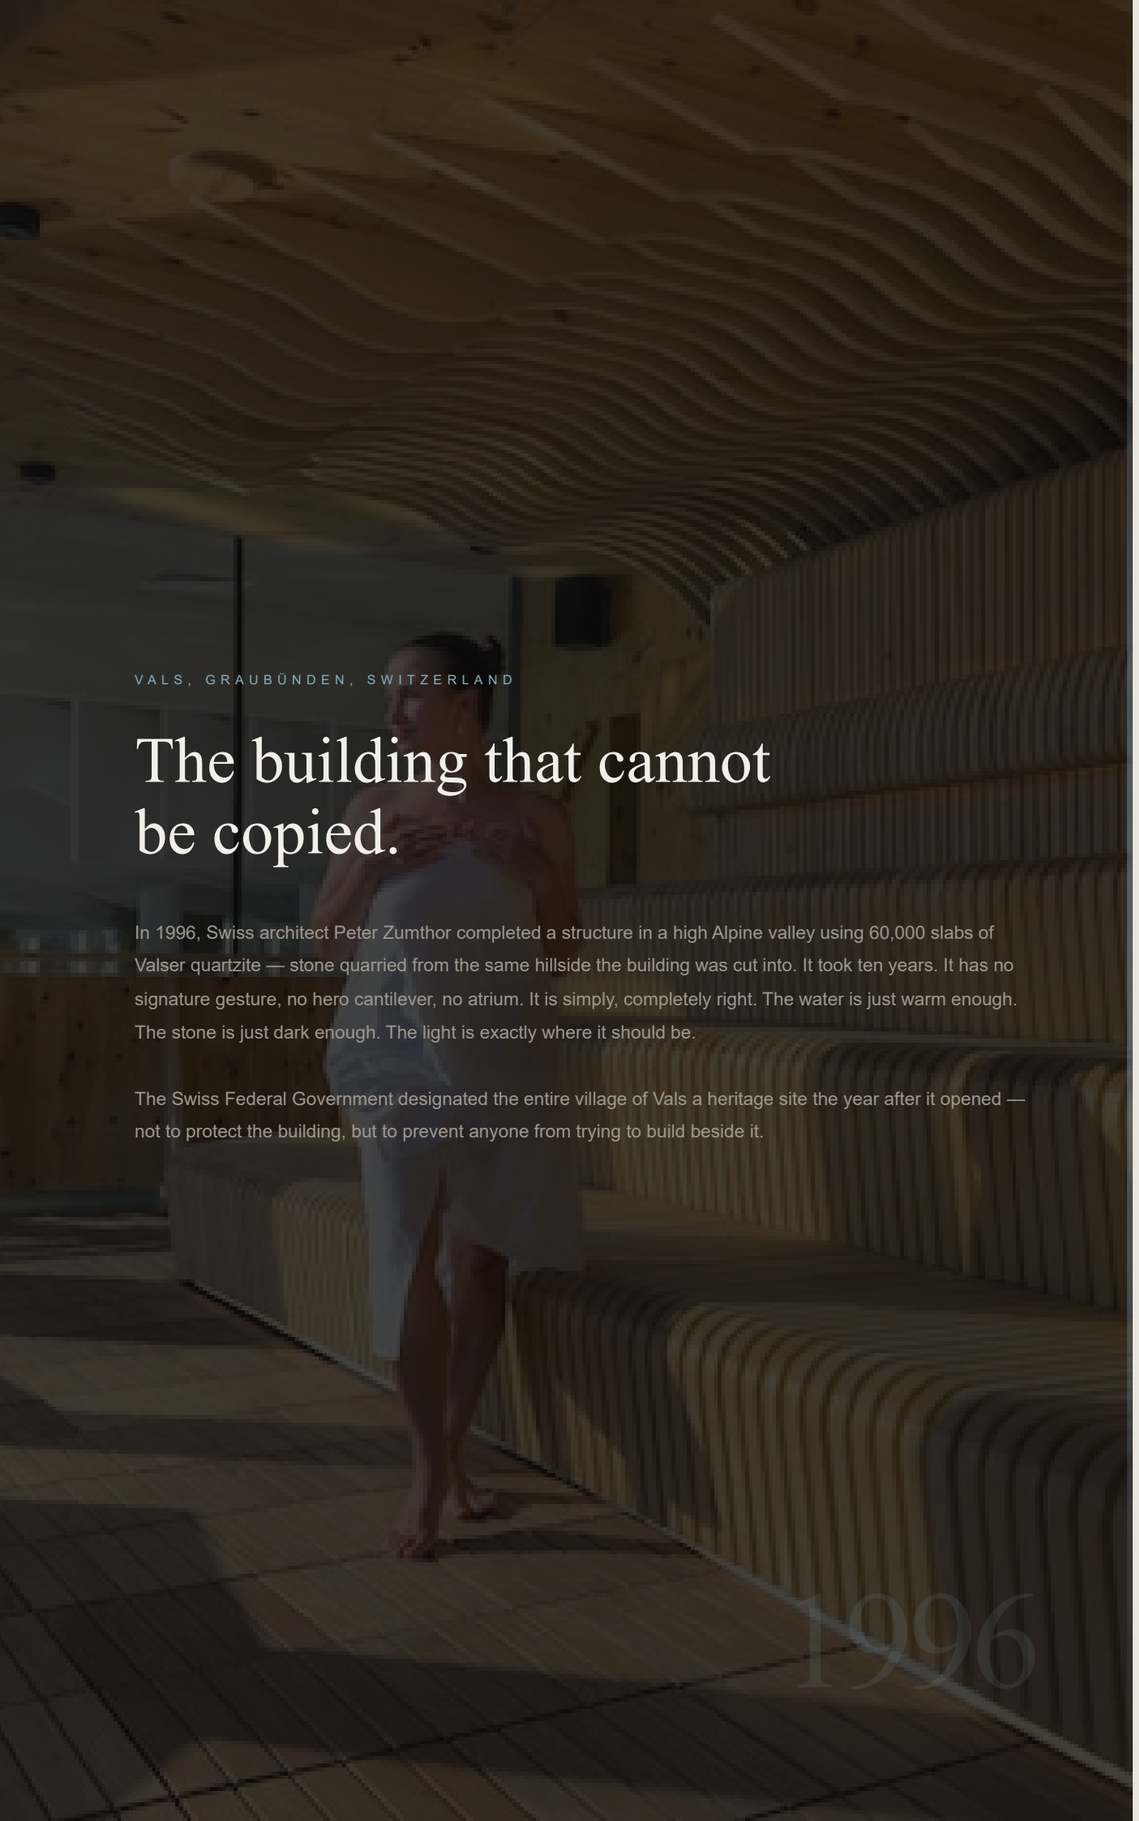
TWELVE PRIVATE VILLAS · JUBILEE HILLS

Therme

Built from what it stands on.



VALS, GRAUBÜNDEN, SWITZERLAND

The building that cannot be copied.

In 1996, Swiss architect Peter Zumthor completed a structure in a high Alpine valley using 60,000 slabs of Valser quartzite — stone quarried from the same hillside the building was cut into. It took ten years. It has no signature gesture, no hero cantilever, no atrium. It is simply, completely right. The water is just warm enough. The stone is just dark enough. The light is exactly where it should be.

The Swiss Federal Government designated the entire village of Vals a heritage site the year after it opened — not to protect the building, but to prevent anyone from trying to build beside it.

1996

THE TRANSLATION

"An architecture of presence. Not representation, not symbol. The thing itself, completely itself."

> Therme in Jubilee Hills does not reference Zumthor's building in form — the climate, the site, and the brief are entirely different. It references his method: materials chosen from nearby, walls that know why they are thick, every surface having earned its position. There is no detail at Therme that was placed for a photograph. Everything was placed to be lived in.

01

Basalt plinth

The ground floor reads as a single mineral element — quarried basalt, honed to a matte finish. It absorbs light instead of reflecting it. The building begins here, in the same material the Deccan plateau is made of.

02

Limestone render

Upper walls in honed limestone — the same aggregate family as the thermal travertine of Roman baths, the white churches of Puglia, the cliffs of Jurassic stone. Its patina deepens over years, not decades.

03

Teak pivot door

The entrance door is solid teak, oil-finished, three metres tall. Its weight is the weight of permanence. You do not push it — you lean into it, and it moves. This is the first thing Therme teaches you about itself.

04

Still water

Each villa's private pool is set flush with grade — water at ground level, not raised platform level. This is not an aesthetic choice. It is an argument: that water belongs at the same elevation as the earth it occupies.

"We did not choose the materials. The site chose them for us."

Every material at Therme has a reason for being there. Not a style reason — a structural, climatic, or material reason. The result is an architecture that ages differently than buildings assembled from catalogues.

Twelve residences.
One estate.
No repetition.

PRIVATE VILLAS

XII

TOTAL, ACROSS THE ESTATE.

CONFIGURATION Single-storey · Private gate · Each on own plot	WATER Private pool, flush with landscape · Not shared	STRUCTURE Basalt plinth · Limestone render · Teak entry
ORIENTATION Each villa faces a distinct sightline. No shared views.	PRICE RANGE Rs 13 – 20 Crore · By private appointment	CANOPY Mature estate trees · Pre-existing, designed around

The Therme villa pool is briefed on the same logic: not for display, for use.

PRASHASHAN NAGAR · JUBILEE HILLS · HYDERABAD

Ten minutes from HITEC City. A different register entirely.

10'
From HITEC City
by car

0
Through traffic.
The neighbourhood has none.

35+
Year old canopy.
Mature trees throughout.

XII
Villas behind
one gate. No more.

Prashashan Nagar is what parts of Jubilee Hills became when enough time had passed that they stopped needing to prove anything. The canopy grew in without instruction. The families who live here stopped talking about the address decades ago. No through traffic — which in Hyderabad in 2026 is not a feature but an inheritance, and Therme is built in its pocket. The materials do not try to stand out from the neighbourhood. They try to belong to it.

THE DEVELOPER

SSquare
Est. 1991

Thirty-five years building the commercial infrastructure of a city that never stopped growing. Over ten million square feet of premium commercial real estate in Hyderabad — privately held, privately financed, delivered without announcement. SSquare has never needed to advertise its standard. Its buildings have always been the argument.

Therme is their first and only residential project. The same material rigour that built their commercial portfolio, applied — for the first time — to the place where twelve families will actually live.

35
Years in Hyderabad commercial real estate

10M+
Sq ft delivered. Premium commercial.

01
Residential project. This is it. It will be their only one.
