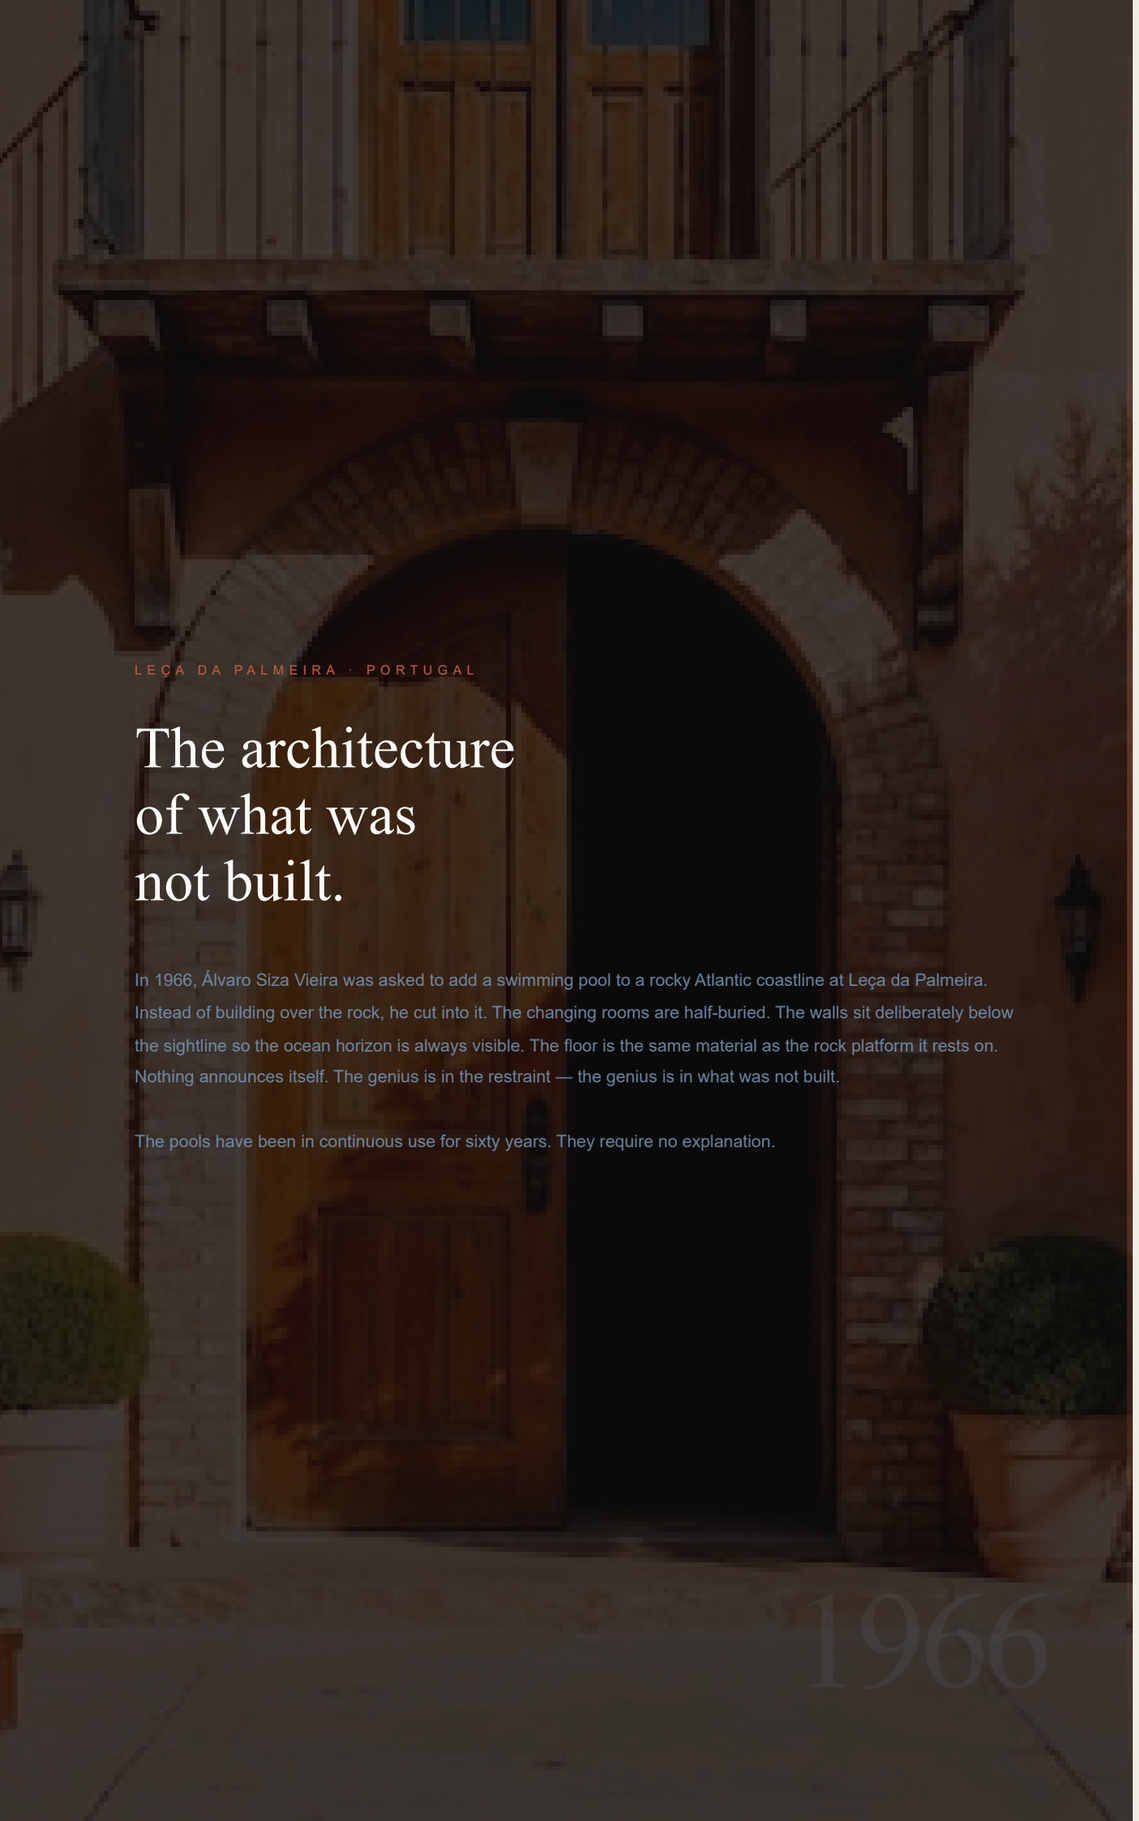
TWELVE PRIVATE VILLAS · JUBILEE HILLS

Verano

The unhurried life of the estate.



LEÇA DA PALMEIRA · PORTUGAL

The architecture of what was not built.

In 1966, Álvaro Siza Vieira was asked to add a swimming pool to a rocky Atlantic coastline at Leça da Palmeira. Instead of building over the rock, he cut into it. The changing rooms are half-buried. The walls sit deliberately below the sightline so the ocean horizon is always visible. The floor is the same material as the rock platform it rests on. Nothing announces itself. The genius is in the restraint — the genius is in what was not built.

The pools have been in continuous use for sixty years. They require no explanation.

1966

THE TRANSLATION

"One&Only Resorts uses the same logic: each property is defined by what the site already had."

> The reef, the grove, the mountain — the architecture's job is to not compete with it. Verano in Jubilee Hills is briefed on this same discipline: the canopy is already there, the light already arrives at a particular angle in the morning, the topography already has an opinion. Every decision at Verano begins with the question: does this need to be here, or does the site already handle it?

01

The terrace at noon

Sun-warmed sandstone underfoot. The terrace does not end at a wall — it meets a low parapet, and beyond it, the tree canopy. You cannot see the street from here. You can only see the estate. The hour passes without requiring anything.

02

Still water, stone edge

The pool is flush with the garden level — not elevated, not framed. The stone coping is the same material as the terrace. Water and ground occupy the same plane. This is not architecture announcing itself. This is architecture stepping aside.

03

The shade tree

The canopy at Prashashan Nagar is decades old. Verano's footprint was designed around these trees, not despite them. The shade was already there. The villa was positioned to receive it. You do not plant a mature tree. You inherit one.

04

The unhurried morning

East-facing courtyards. The morning light enters at the angle it chooses. No skylights engineered to compensate. The kitchen faces east because the day begins there. The living room faces the garden because the afternoon belongs there. The plan follows the sun.

"The site already knew what it wanted to be."

Each material at Verano was chosen because the site suggested it — the terracotta in the soil, the warm stone of the plateau, the shade already given. Nothing was imported for effect. Everything has a reason that precedes the architecture.

Twelve residences.
One estate.
Nowhere else to be.

PRIVATE VILLAS

XII

TOTAL, ACROSS THE ESTATE.

CONFIGURATION Single-storey · Private gate · Each on own plot	WATER Private pool, flush with garden · Not shared	ORIENTATION Each villa positioned around existing canopy
TERRACE Sun-warmed stone · Below the horizon line	PRICE RANGE Rs 13 – 20 Crore · By private appointment	CANOPY Mature estate trees · Pre-existing, designed around

Siza at Leça never added to the coastline. He subtracted from what did not belong. The pools are an argument that restraint is the highest form of generosity. Verano is briefed on the same argument: the canopy, the morning light, the still water — these were already here. The architecture's job was to not get in the way.

THE DESIGN LOGIC

The site already knew.

Verano's villas step back to let the Jubilee Hills canopy and light take precedence. The architecture does not compete with what is already here. Walls are low where the view matters. The terrace is wide where the afternoon is long. The garden level is the pool level. Everything was placed to be lived in, not photographed.

PRASHASHAN NAGAR · JUBILEE HILLS · HYDERABAD

The canopy arrived before anyone asked for it.

10'
From HITEC City by car

0
Through traffic. The neighbourhood has none.

35+
Year old canopy. Mature trees throughout.

XII
Villas behind one gate. No more.

Prashashan Nagar is what happens when a neighbourhood stops needing to prove anything. The trees grew in on their own timeline. The morning light falls at an angle that no landscape architect designed. There is no through traffic — which in

Hyderabad in 2026 is not a planning feature but an inheritance. Verano does not try to add to this. It tries to belong to it. The walls are warm. The terraces are low. The hours are long.

THE DEVELOPER

SSquare
Est. 1991

Thirty-five years building the commercial infrastructure of a city that never stopped growing. Over ten million square feet of premium commercial real estate in Hyderabad — privately held, privately financed, delivered without announcement. SSquare has never needed to advertise its standard. Its buildings have always been the argument.

Verano is their first and only residential project. The same material rigour and unhurried judgment that built their commercial portfolio — applied, for the first time, to the place where twelve families will actually live.

35
Years in Hyderabad commercial real estate

10M+
Sq ft delivered. Premium commercial.

01
Residential project. This is it. It will be their only one.
